¹ For internal projects that highly depend on the Core Facility Immune Response & Biomarkers, a technician can be hired in the framework of those projects.

² Costs correspond to the number of samples indicated. For higher numbers of samples, costs are subject to offers and negotiation. Please contact us and ask for a quotation.

³ For multiplex assays.

⁴ Some examples listed but more biomarkers are possible. Please contact us and ask for availability and quotations.

⁵ Costs of immunoassays are indicative of SARS-CoV-2, final fees involving custom antigens depend on analytes selected and supplier prices. Customized antibody assays can be prepared according to specific requests and costs. Please contact us and ask for a quotation.

NA cost/analyte depends on the number of analytes in the panel
